dal 1959 produttori di macchine professionali per il cantiere edile e stradale

IMPREGNATING MACHINES

“Paoloni Onelio & Figlio” presents the full range of impregnating machines for the woodworking industry.

The machines meet every requirement and can impregnate every type of timber profile: match boards, elements of prefabricated housing, construction timber, beams of any size as well as window components and skirting boards.

The compact nature of the machines, the ease of cleaning, the cost and the inexpensive spare parts all go to make Paoloni machines an indispensable way to impregnate any type of wood, more effectively and in a shorter time, producing big savings in labour and paint.

Beams and boards leave our impregnating machines perfectly treated and without stains or dripping paint.

THE RELIABILITY OF THREE GENERATIONS!
